WELCOME TO SAGAFORM'S SPRING 2018 COLLECTION!

In this catalogue you will find our ENTIRE range for the Profile market, with a focus on gifts of every kind, coffee mugs for the office and To Go products, as well as other smart, attractive, high-quality and highly functional promotional products.

Sagaform has been helping to create good, loving relationships for nearly 25 years. We do this by offering carefully selected, smart, functional products in attractive packaging that are just as much fun to give as they are to receive – or even to buy for yourself. Through our collaboration with renowned designers, we can offer gifts with that little bit extra, which means they are well-received by most people, as they complement what they already have or perform a function they didn't even realise they would be really glad of.

We are now looking forward to spring and summer and all the great opportunities these seasons offer for customer events and kick-offs involving trips out with good food or beautifully dressed tables at home both indoors and out. The Sagaform Spring Catalogue is full of our existing popular products perfect for all these occasions along with lots of new, practical classics you will be using for many years to come.

Best wishes,

Anna Lilja

BAR

Lounge music, a sociable hum and dimmed lighting. Sitting in a bar can quickly help us to unwind and enjoy the relaxing atmosphere – and it is this feeling of luxury we want in our homes too. Even though it isn't possible to recreate everything a bar can offer, the way in which drinks are served is an important element. It is for this reason that Sagaform has created a series of glasses, carafes and tools that belong to the bar. Muddlers to stir your cocktails, beer glasses and drinks stones are just some of the popular products created by our designers.

A wooden tray holds several items: a glass of yellow liquid on the left, a glass of blue liquid in the center, and a glass of yellow liquid on the right. A small plant with green leaves and brown seed heads is in the top left. A white cloth is draped over the bottom right. The background is a soft-focus outdoor scene.

SWEDEN

We have captured a genuinely Swedish feel in our Sweden series – symbols with which our rectangular country is inextricably linked.

What could be more Swedish than a Dala horse? Blue, red and yellow appear in this series of playful products containing items such as coasters, bowls and glasses. Perfect for anyone who, quite simply, wants to celebrate Sweden's heritage.

ETHICS/ENVIRONMENT

A joyful world needs companies that take responsibility for the environment and ethics. We have an active CSR strategy which includes everything from reducing greenhouse gas emissions and recycling packaging to improving working conditions in the countries where our products are made.

SOCIAL RESPONSIBILITY AND OUR CODE OF CONDUCT

Sagaform does not own any factories. Instead we work with external suppliers who specialise in areas such as glass or ceramics. We demand that our suppliers abide by ILO conventions and work towards constant improvements when it comes to the environment and ethics. Our Code of Conduct includes requirements for minimum wages, regulated working hours and a ban on child labour. As active BSCI (Business Social Compliance Initiative) members, we work systematically with supplier inspections, dialogue and follow-up in order to ensure that our Code of Conduct is being complied with. All BSCI inspections are carried out by accredited third-party institutes in order to ensure independent monitoring. This provides quality control assurance for us, our suppliers and for our customers. We also have our own CSR staff in the New Wave Group's purchasing offices, who work full time visiting and supervising our suppliers to ensure that they take social and environmental issues into consideration during production. This forms the basis of good collaboration and better control of the production chain, which is an assurance for us.

LONG-TERM DIALOGUE

Some issues and challenges require collaboration at a higher level. That is why our CSR staff also work in forum and round-the-table discussions with other companies and international organisations. For example, several times a year, we take part in BSCI meetings together with other BSCI companies involved in areas ranging from clothing to food to technical. We also take part in Buyers Forum in Bangladesh, which is coordinated by the World Bank, and has included facilitating discussions with government representatives.

RECYCLING FOR A SUSTAINABLE SOCIETY

By sorting our waste, we can help to reduce environmental impact and create a sustainable eco-cycle. Sagaform takes responsibility for being a producer and pays the costs involved when customers hand in their packaging at collection stations for recycling. The Green Dot is international proof that our packaging is part of a recycling system. We think that feels good!

MORE ON THE ENVIRONMENT

Transport produces a large proportion of the world's greenhouse gas emissions. Transport by boat is generally the best alternative for goods that are shipped long distances and we try to avoid air transport as far as possible. Sagaform has two main strategies for reducing our impact on the environment from transport. We try to influence the shipping agents and transport companies we work with by participating in the "Clean Shipping Project" network. This network, which was founded in 2007, has created a tool that helps companies to evaluate various freight and shipping agents according to their environmental impact. This information can then be used during negotiations in order to pressurise agents to make environmental adaptations. We also consolidate all our shipments with our sister companies within the New Wave Group. In this way, we protect the environment from unnecessary journeys and half-filled loads by making sure containers and loads are always full.

OUR WORK ON CHEMICALS

Sagaform products should be safe and free from banned substances. That is why all our suppliers must follow the standards set out in the Group's chemical list. The list has been created to comply with current legislation, such as REACH and EU regulations on products that come into contact with foodstuffs, as well as taking recommendations from various industries into account. We are part of the Swerea Chemicals Group, through which we are party to all the latest information and developments concerning chemicals and regulations. We also carry out random checks and tests to make sure the products in our range live up to Sagaform's demands.
